Technical Skills

VS Code, Command Line, HTML5, CSS3, Bootstrap, JavaScript, ES6, jQuery, Node.js, Handlebars, Express.js, Cheerio, Axios, React.js, MongoDB, Mongoose, MySQL, Sequelize, Git, Firebase and more

Full Stack Web Projects

Firefly Remembory

GitHub: [Code](#) | Deployed site: [Firefly Remembory](#) | Role in project: All roles

A memory game that presents you with twelve buttons and requires you to press the buttons in sequence.

- This project was designed and built in one week
- Built with VS Code, HTML5, CSS3, Bootstrap, Node.js, JavaScript, Axios and Heroku

News Scraper

GitHub: [Code](#) | Deployed site: [News Scraper](#) | Role in project: All roles

This application scrapes the Screen Rant home page for movie news and articles and saves them to a Mongo database. It then displays those articles in an easy to read layout while also giving you the ability to save.

- This project was designed and built in a week
- Built with VS Code, HTML5, CSS3, Bootstrap, JavaScript, Node.js, MongoDB, Mongoose, Express, Handlebars, Cheerio, Axios, Heroku

Sassy Cat in Space

GitHub: [Code](#) | Deployed site: [Sassy Cat](#) | Role in project: Front End

A delightful little galactic domination simulator. Ever wondered what it would be like to hop into a ship that hates you, fly to real exoplanets discovered by NASA and attempt to conquer them for political power? This is the game for you.

- This project was designed and built in two weeks with a team of four. Using GitHub, slack, Trello and as much face-to-face communication as possible.
- Built with VS Code, HTML5, CSS3, Bootstrap, Node.js, Express, MySQL, Heroku and Sequelize
